

BATTERY RECYCLING

As part of our commitment to reduce the environmental impact of our own operations NORMANS are now offering a take back scheme for all portable waste batteries. You can return your waste batteries to our business premises in person, **please do not post**

Alternatively you can find your local waste portable battery recycling facility at www.recyclenow.com

Also most supermarkets and shops that sell batteries will have collection bins for used batteries, and some town halls, libraries or schools may also have set up collection points. End users may find these alternative options more accessible.

Why we take Batteries recycling so seriously.

Some household batteries contain chemicals like lead, mercury or cadmium. If batteries are not disposed of properly, they may end up in landfill, once buried, the batteries start to break down, and these harmful chemicals may then leak into the soil or water causing pollution.

Recycling helps prevent pollution and also helps recover valuable resources.
